

Lucky Boba POS

Branch Manager User Guide & Operating Manual

Complete reference for branch-level daily operations

Welcome to the **Lucky Boba POS Branch Manager Portal**! As a Branch Manager, you are responsible for overseeing the daily operations, staff performance, inventory replenishment, and financial auditing at your assigned branch location. This guide details every single sidebar tab, structured in their exact visual sequence, along with step-by-step instructions and operational rules.

Sidebar Navigation Tip (Accordion Folders)

Several navigation menus are grouped into collapsible accordions (dropdown folders) marked with ▼ or ▲. If you cannot see a specific tab, click the parent folder row to expand it:• App Management (App Orders, Menu Availability, Payment Settings)• Sales Reports (Sales Dashboard, Items Report, Branch Receipts, Branch Expenses, X-Reading, Z-Reading)• Menu Items (Menu List, Categories, Sub-Categories)• Inventory (Overview, Raw Materials, Usage Report, Recipes, Purchase Orders, Stock Transfer)

Section A: Home Group

A1. Central Dashboard Tab

Purpose: Live operation snapshot displaying real-time branch performance metrics, sales graphs, and terminal status summaries.

Key Operations:

- Review current net sales, transaction count, average basket size, and active cashiers today.
- Monitor the hourly sales chart to verify customer traffic.
- View active alerts for pending online orders or low inventory stock.

A2. Staff Performance Tab

Purpose: Auditing cashier transaction statistics, speed, and sales performance.

Key Operations:

- Tracks transaction count, cumulative sales generated, average time per transaction, and void rates per cashier.

Void Rate Alert

If a cashier's void-to-sale ratio exceeds 5%, the system highlights their scorecard block in red and flags them as High Risk. Branch managers should review their live terminal activity, count cash drawers, and audit receipt void histories immediately.

A3. User Management Tab

Purpose: Manage employee accounts under your assigned branch. You can create accounts for **cashier**, **supervisor**, or **team_leader** roles.

How to Add a New Employee:

1. Open the **User Management** tab.
2. Click **+ Add User** in the top right.
3. Fill in **Name**, **Username** (employee work email), and set a temporary **Password** (min. 6 characters).
4. Select the **Role**:
 - **cashier**: Operates a specific terminal register.
 - **team_leader** / **supervisor**: Manages daily floor shifts. Requires a 6-digit manager PIN to allow supervisor bypass approvals on cashier screens (e.g., void actions).
1. Map their branch to your store. Set status to **ACTIVE**.
2. Click **Save User**.

Bypassing Forgotten PINs or Resetting Passwords:

1. Select the staff member in the user list.
2. Click the **Edit (Pencil Icon)** on their row.
3. Enter a new password or enter a new **6-digit manager PIN**.
4. Click **Update User**.

A4. Device Management Tab

Purpose: Pair and monitor local branch physical kiosk/POS terminals.

Registering a Local Device:

1. Go to the **Device Management** tab.
2. Click **+ Register Device**.
3. Provide a terminal name (e.g. Cashier Station 1), Kiosk POS number, and the device's physical **MAC Address**.
4. Click **Register** to bind the device to your store.

Physical Installation Link

On the local computer machine running the POS terminal app, you must configure the exact application folder path where the local POS files reside. Setting this path allows the local application to read hardware details and register/sync the device signature with the server.

Section B: App Management Accordion Group

B1. App Orders Tab

Purpose: Live tracking and fulfillment of mobile orders submitted via the customer application.

Pending Count Badge:

- The sidebar displays a real-time purple counter badge indicating the number of **Pending Mobile Orders** requiring immediate review. The counter polls the server every 30 seconds for updates.

Processing App Orders:

1. Click the **App Orders** tab.
2. Select a pending order to review items, customer specifications, and payment confirmation.
3. Click **Accept & Prepare** to send the order to the kitchen.
4. When ready, click **Dispatch** to coordinate with delivery riders, or select **Ready for Pickup** for takeaway.
5. Select **Delivered / Completed** to finalize.

B2. Menu Availability Tab

Purpose: Instantly toggle product availability for online and mobile app orders.

Step-by-Step Instructions:

1. Open the **Menu Availability** tab under the accordion.
2. You will see a grid displaying all system drinks and categories.
3. Locate the item (e.g., Matcha Latte – Large).
4. Toggle the switch to **Disabled** if an ingredient (e.g., Matcha powder) is out of stock. This immediately hides the item from the mobile customer application.
5. Once restocked, toggle the switch back to **Active**.

B3. Payment Settings Tab

Purpose: Configure mobile payment checkouts for GCash or Maya transactions at your branch.

Key Operations:

- Manage branch merchant keys, active checkout methods, and QR code upload configurations. Ensure merchant signatures match branch licenses.

Section C: Sales Reports Accordion Group

C1. Sales Dashboard Tab

Purpose: Financial review of daily and periodic sales performance.

Key Operations:

- Filter sales by date range (e.g. Daily, Weekly, Monthly) or shifts (AM/PM).
- Review revenue trends, top-selling product statistics, average customer spend, and payment distributions (Cash vs. e-Wallets).

C2. Items Report Tab

Purpose: Tracking product-level sales volumes.

Key Operations:

- Audits columns listing drink name, cup sizes, parent category, total quantity sold, revenue, average selling price, and order frequency.
- Enables column-based sorting and features an **Export to CSV** button to download spreadsheets for local stock audits.

C3. Branch Receipts Tab

Purpose: Live receipts search and cashier audit ledger.

Key Operations:

- Search transactions by receipt SI number, cashier ID, customer name, date range, or payment status.
- **Reprint:** Select a receipt and click reprint to generate a duplicate receipt, kitchen slip, or label stickers.
- **Void:** Initiate a cancellation. A manager's 6-digit PIN and a mandatory reason note must be logged.

C4. Branch Expenses Tab (Petty Cash and OPEX)

Purpose: Logging local branch-level operational expenditures (OPEX).

Step-by-Step Instructions:

1. Open the **Branch Expenses** tab.
2. Click **+ Add Expense**.
3. Select the category: Utilities, Local Procurement (e.g. purchasing emergency ice from a grocery store), Petty Cash, or Repairs.
4. Input the amount, payment method, date, and a brief description.
5. Upload a digitized photo of the official receipt.
6. Click **Save Expense**.

Accounting Role: These logs are subtracted during cross-branch P&L calculation:

Net Profit = Gross Sales – COGS – OPEX

C5. X-Reading Tab

Purpose: Mid-shift register cash drawer auditing.

How it works: Provides a running snapshot of the register before it is closed (checked by supervisors mid-shift). Displays running transaction count, expected cash in drawer, e-wallet transactions, expected VAT breakdown, and discounts applied. Does not lock the register.

Expected Drawer Cash = Cash Float + Cash Sales – Cash Drops

C6. Z-Reading Tab (EOD Audit and Reopening Shifts)

Purpose: End-of-Day (EOD) closure and register auditing.

Step-by-Step Instructions:

1. Go to the **Z-Reading** tab.

2. Select the target **AM Shift** or **PM Shift**.
3. Compare the **Declared Cash** counted physically in the drawer against the **System Calculated Cash**.
4. If balanced, click the **Close Shift (Generate Z-Reading)** button. This locks the register activities, resets the cashier's assigned shift limits, and prints the permanent daily closure totals.

Reopening a Closed Shift (Constraints):

Branch Managers can reopen a closed shift to correct cash count errors or record late transactions:

1. Select the target closed shift.
2. Click the **Reopen Shift**  button.

The PM Constraint

You CANNOT reopen the AM Shift if the cashier on the subsequent PM Shift has already completed a cash-in operation. The PM Shift cashier's cash-in must be deleted/rolled back first before the AM Shift can be unlocked.

Section D: Menu Items Accordion Group

D1. Menu List Tab (Regular and Composite Items)

Purpose: View-only access to all menu items, price tiers, and customizer options.

Key Operations:

- Review product details, sugar/ice level modifiers, price variances between Medium and Large cups, and composite items.

Composite Items Review:

- **Combo:** A combination pairing consisting of exactly 1 food and 1 drink (e.g. Classic Milk Tea + Croffle).
- **Bundle:** A package consisting of drinks only (e.g. 2 Drinks Deal).
- **Note:** Recipes and stock deductions for composite items are automatically aggregated and deducted by the system by combining individual items. No manual setup is required.

D2. Categories Tab

Purpose: View-only classification of categories (e.g., Classic Series, Snacks).

Key Operations: Verify order listing positions and active category tags.

D3. Sub-Categories Tab

Purpose: View-only classification of nested subcategories.

Key Operations: Inspect nested subcategories mapped to main classifications.

Section E: Inventory Accordion Group

E1. Inventory Overview Tab

Purpose: Main branch inventory control panel.

Key Operations:

- Monitor low stock items, total inventory value, batch expiration calendars, and quick shortcuts to pending purchase orders.

E2. Raw Materials Tab (Stocktakes and Count Adjustments)

Purpose: Update stock levels and record manual physical stocktakes.

Performing a Physical Stocktake / Count Adjustment:

1. Open the **Raw Materials** tab.
2. Locate the ingredient (e.g., Tapioca Pearls).
3. Click the **Count / Adjust** button on the row.
4. Input the new **Physical Count** (in grams/milliliters/pieces) manually counted in the warehouse.
5. Select a reason: Physical Count Audit, Spillage/Wastage, or Delivery Discrepancy.
6. Click **Confirm Adjustment**. The stock balance is updated and logged in the Usage Report.

E3. Usage Report Tab (Inventory Flow & Discrepancies)

Purpose: Auditing raw material consumption, wastage, and inventory shrinkage.

How it works: Compares expected usage against actual physical stock levels.

End-to-End Example: Okinawa Milk Tea (Large)

Recipe Linkage: A large cup requires 50g Okinawa Powder (₱0.20/g) and 30g Tapioca Pearls (₱0.10/g).

Expected Depletion (Theoretical Usage): If the branch sells 100 cups of Okinawa Milk Tea (Large) in a week:

- Okinawa Powder theoretical depletion: $100 \times 50\text{g} = 5,000\text{g}$
- Tapioca Pearls theoretical depletion: $100 \times 30\text{g} = 3,000\text{g}$

Inventory Reconciliation Table:

Raw Material	Starting Stock	Received	Expected End	Actual Physical Count	Variance	Discrepancy Cost	Action Required
Okinawa Powder	10,000g	0g	5,000g	4,800g	-200g	-₱40.00	Negative Variance: Powder spillage or over-portioning occurred.
Tapioca Pearls	5,000g	0g	2,000g	2,000g	0g	₱0.00	Balanced: Scoop portioning is accurate.

E4. Recipes Tab (View-Only COGS)

Purpose: View-only access to product ingredient recipes.

Key Operations:

- Review linked ingredients and expected portion sizes (grams/milliliters) to verify portion controls.

E5. Purchase Orders Tab (Stock Replenishment)

Purpose: Replenishing branch stock from suppliers.

Creating and Requesting Stock Replenishment:

1. Click the **Purchase Orders** tab.
2. Click **+ Create PO** in the top right.
3. Select the **Supplier** and specify your branch as the destination.
4. Add the raw materials and target quantities to be ordered.
5. Click **Submit for Approval**. (The order goes to the Superadmin for review and financial approval).

Receiving a Delivery Shipment:

1. When the delivery truck arrives, locate the pending PO in this tab.
2. Click **Receive PO** (or inspect delivery details).
3. Count and verify the delivered quantities against the purchase list.
4. Enter the actual received quantities.
5. If correct, click **Mark as Received**. This immediately increases your branch stock balances.

Delivery Discrepancy

If you receive fewer items than listed, enter the lower count. The system automatically flags this under the Usage Discrepancy report for regional audits.

E6. Stock Transfer Tab (Inter-Branch Shipping)

Purpose: Managing stock transfers to/from other branches.

How it works:

- **To Ship:** Click **+ New Transfer Request**, specify the destination branch, choose ingredients, and click **Initiate Transfer**.
- **To Receive:** Locate incoming transfer requests, verify the physically received quantities, and click **Approve & Accept** to add them to your local branch inventory.

Section F: Floor Ops Group

F1. Online Orders Tab (Live Kiosk & App Orders)

Purpose: Live order tracking monitor for customer kiosk and web orders.

How it works: Real-time terminal grid showing active tickets. Monitor order preparations, update kitchen tickets, and mark orders as complete to update front-facing screens.

Section G: System Group

G1. Audit Logs Tab

Purpose: Chronological trace of actions performed at the local branch.

Key Operations: Review supervisor overrides, manually adjusted inventory values, cash count overrides, and cashier sign-in histories to ensure operational security.

G2. Promos and Discounts Tab

Purpose: Manage active branch promos.

How it works: Lists franchise-wide promotion rules. Managers can toggle switches to **Active** or **Disabled** to apply or suspend specific discounts at their local terminal screens.

Section H: Settings and Sub-Menus Group

H1. Settings Tab

Purpose: Manage branch preferences.

How it works: Configure local timezone metadata, store alert thresholds, and custom receipt notes (e.g. "Thank you for visiting Lucky Boba!").

H2. Settings Redirected Actions

From the settings panel, managers can access the following secondary administrative sub-menus:

- **Add Customers:** Manage local branch customer database registers and view customer statistics.
- **Add Vouchers:** View and manage voucher options active at your branch.
- **Backup System:** Click **Backup Now** to save a localized database dump of transaction logs and inventory counts to a local drive.
- **Customer Report:** View analytical graphs detailing customer visit counts, average spends, and product preferences.
- **Import Data / Upload Data:** Local utility scripts to quickly update spreadsheets or upload stock take checklists.
